Noviyan Hogy Andika Suryanto

JUNIOR SOFTWARE ENGINEER

📧 aansan26@gmail.com 📱 +62-858-8889-8524 📍 Yogyakarta, Indonesia 🌐fnstory.my.id

🔗github.com/aansan

PROFESSIONAL SUMMARY

JavaScript-focused Software Engineer with strong fundamentals in ES6+, asynchronous logic, and DOM manipulation, actively building projects with React and TypeScript. Currently expanding full-stack programming foundations through intensive coursework at Koding Up alongside interactive curricula at Codédex. Experienced in public sector operational data integrity and leveraging modern AI workflows (Claude, Gemini, ChatGPT) for rapid prototyping, debugging, and shipping maintainable web applications.

TECHNICAL SKILLS

Languages & Core:	JavaScript (ES6+, Async/Await, DOM), TypeScript (Foundations), HTML5 Semantic, Modern CSS3
Frameworks & Web:	React (Components, Hooks, State Handling), Responsive Design, Web Performance (WebP, Media Compression)
AI & Automation:	AI Coding Tools & Agents (Claude, Gemini, ChatGPT), Prompt Optimization, Administrative Scripting
Tools & Deployment:	Git, GitHub, Cloudflare Pages, Vercel, Netlify, Chrome DevTools

FEATURED PROJECTS

FNStory — Digital Invitation & Media Platform | fnstory.my.id

Live Project

- Architected and launched a responsive, mobile-first single-page web app delivering interactive event media and schedules.
- Engineered web performance enhancements via modern formats (WebP image pipeline, AAC/M4A audio), ensuring instantaneous loads on mobile networks.
- Implemented automated edge deployment and custom domain DNS routing using Cloudflare Pages.

BBM Management & Administrative Automation Web App | github.com/aansan/BBM

Open-Source Tool

- Developed a lightweight client-side utility using vanilla JavaScript to streamline fuel coupon tracking and operational calculations.
- Eliminated repetitive manual record-keeping by automating data validation and ledger reconciliation on the front end.

CERTIFICATIONS & TECHNICAL TRAINING

Koding Up — Software Engineering Bootcamp Track | Active Enrolment

2026 – Present

- Engaged in rigorous training centered on algorithmic problem-solving, modern JavaScript patterns, and software architecture.

Codédex — Web Development Certifications | Verified Credentials

Issued 2026

- **JavaScript Track:** Algorithm design, DOM manipulation, asynchronous logic (Verify #a106b734).
- **CSS Track:** Selectors, flexbox, grid, box model architecture (Verify #19a72da3).
- **HTML Track:** Semantic HTML5 structure and accessible forms (Verify #7312686d).

PROFESSIONAL EXPERIENCE

Data & Information Processor / Systems Custodian | **Pemda DIY (Special Region of Yogyakarta)** *03/2021 – Present*

- Maintain and reconcile state administrative data and asset inventory across departmental databases with zero discrepancies.
- Utilize internal digital platforms (e.g., Diarindu) to optimize personnel workflows and ensure strict regulatory audit compliance.

EDUCATION

Polytechnic of State Finance STAN (PKN STAN) | **Diploma III in Accounting (GPA 3.27)** *Graduated 2020*
